

*2016 Chairman*

*Martin K. Till*

I lost my father 30 years ago to a massive heart attack, and two of my brothers have taken preventive measures by undergoing

angioplasty and stint procedures. My mother deals with heart disease on a daily basis, and I will need to see a cardiologist in my future.

Advancements made by the American Heart Association will allow my family to spend many more years together. This is why I chose to Chair the Get Your Heart Racing Gala.
